OVERVIEW

Fossil Contracting is a Zimbabwean contracting firm whose bouquet of service offerings comprises Civil Works, Contract Mining, Road Construction, Earth Works, Building & Structural Works, Asphalt Production, and Plant Hire. Since its official inception in 2010 (though it traces its maiden operations back to 2000), the company has grown in leaps and bounds.

The company is driven by a fleet-footed and experienced management team, with support from a staff complement of over 100 employees, whose spectrum of specialization runs across operators, technicians, engineers, tradesmen, and contract employees.

Fossil is a Category A ranked member of the ZBCA, a Category A ranked member of CIFOZ, and a Category A ranked member of the Ministry of Local Government and Public Works, which accolades are the highest possible rankings for any construction company in Zimbabwe. Fossil's portfolio thus attests to the number of high-value and well-executed projects. The company's reputation has seen it securing contracts with high-profile organizations such as Zimplats, Nyaradzo, Econet, Zinara, Unki Group, Government, and local authorities.

Fossil Contracting is expanding its footprint into the region and has established operations in South Africa, Zambia, and is looking forward to entering the Mozambiquean market in pursuit of global economies and attaining ISO 9001:2015 certification for quality management systems by mid-2020. Fossil Contracting owns an asset base that includes more than 100 major items of earth-moving, road construction, surfacing, and concrete equipment, as well as a large quantity of ancillary equipment.

Fossil is committed to ensuring zero harm at all its sites and in its operations. To that end, Fossil has a vibrant S.H.E.Q department that ensures uncompromising adherence to standard quality checks while being cognizant of requisite health and safety procedures. This helps in avoiding injuries as the Fossil team conducts thorough Hazard Identification and Risk Assessment procedures before commencing work duties each day.

CORPORATE IDENTITY

VISION

To be a distinguished and innovative civil engineering contracting firm in the SADC Region.

MISSION

Fossil has a calling of taking Zimbabwe to first world competitiveness through infrastructure development that meets international standards while creating value for its stakeholders with a keen eye on environmental conservation.

- **Customer Care**

We commit to listen, understand, and act on feedback to improve our services to meet each client's specific needs both present and future.

- **Innovation**

The only way to survive in this environment is to continue reinventing ourselves and creating solutions, because we believe in thinking differently and that we can always better our best.

- **Communities**

We endeavor to support the communities within our sphere of influence, hold ourselves to the highest standards of ethical conduct and environmental responsibility.

- **People**

Our success depends upon high performing people working together in a safe and healthy environment where diversity, development, and teamwork are valued as well as encouraged.

- **Environment**

We realize that the environment is a heritage; hence we comply and exceed set policies in safeguarding the environment in both our operational methods and in the equipment we use.

MAJOR INVESTMENTS

2 X 300tn/hour Stone Crushing Plant in Mt Hampden and Chishawasha

2 x 100k/day Brick Plant

4 x Pre Mix Concrete Production Plants

1 x Concrete Production Plant

4 x Washed Riversand Plants

FLAGSHIP PROJECTS

INFRASTRUCTURE DEVELOPMENT

Fossil Contracting undertakes a wide range of projects that include Agriculture, Mining, Residential, and Industrial infrastructure. Our scope of work has also included the construction of earth dams and canals. In the mining industry, we have constructed leach tank foundations and support structures for mine shafts and conveyor belt systems.

We have made our name in the provision of high-quality residential infrastructure. Using our depth of experience, we are able to provide full turnkey solutions to meet and exceed customer expectations. For the industry, we have done a lot of work in the PetroChemical industry for multinational companies as well as local blue-chip companies. Details of the projects are highlighted in the project section.

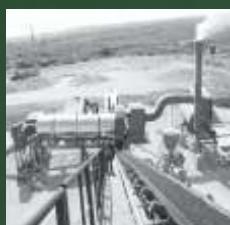

LAND DEVELOPMENT

The company has become a leading brand in land development through turnkey solutions based on PPPs. The solutions are delivered through partnerships with other consultants, contractors, local authorities, and financing partners. The land development model entails identifying urban land, entering into PPPs with local authorities, working with reputable consultants to do all designs, layout drawings, water and sewer main lines, as well as reticulation and construction of roads.

CONCRETE WORKS

The company has carried out vast concrete works projects using reinforced concrete and various technologies to achieve different desired concrete properties. We have mastered the art of designing specialist concrete and have skills to make virtually any type of concrete as may be required by our clients. We have onsite batching plant equipment, and we also utilize onsite premix concrete.

ASPHALT PLANT

Our state-of-the-art Asphalt Plants offer solutions that cater to all market requirements. We own two Asphalt Plants, a stationary one and a mobile one. Both allow us to offer integrated services to our business operations and to the market at large. Both have a combined output of **300 tons per hour**.

OUR OPERATIONS

ROAD CONSTRUCTION

Our capabilities in this sector include construction of different types of roads such as flexible pavements which are surfaced with Bitumen, of different designs and gravel roads. Our work also includes road rehabilitation, drainage works, culverts, open drains, gabion walls, and a 13 km Selous-Ngezi road in partnership with Zimplats which was done in a record of 3 months, rehabilitation of roads for City of Harare, and Asphalt surfacing.

EARTHWORKS

Our bulk earthworks involves bulk stockpiling, excavations, load and hauling operations across Zimbabwe. We have got a medium fleet of dozers, excavators, and tippers that have been used in gravel stockpiling, opencast chrome, and coal mining. Our projects include ZIMSCO chrome mining in Shurugwi, gravel stockpiling of Group 5 for the rehabilitation of the Plumtree-Mutare road, and also on the airport road. We are also doing bulk earthmoving for desilting of several farm dams.

BUILDING WORKS

As demand for our services has increased with clients asking us to take on greater roles in their projects, we set up a team of well-experienced craftsmen and artisans in our building works section. To date we have undertaken complex residential projects for clients who have world-class requirements and specifications.

PLANT HIRE

We hire our plant to the Private Sector and also the Public Sector such as the Department of Roads for works including bulk earthmoving, works such as gravel stockpiling, opencast chrome, and coal mining.
